**PLEASE READ THIS IMPORTANT USAGE
AND SAFETY INFORMATION BEFORE
USING THIS PRODUCT !**

Grappler is designed to act as a rigid hands free load control and guiding device that can be used to push, pull, guide, steer, position & manipulate suspended loads and materials. The tool head is designed to perform multiple functions, pushing, pulling, grabbing, snagging, hooking, guiding and holding. Grappler allows a user to maintain distance from suspended loads while being able to push, pull and move around or with the suspended load. Grappler can be used to help control, position or steer suspended loads such as: materials, components, equipment, parts, rebar, steel coils, assemblies and more. The aluminum tool head design enables a wide array of uses in many different suspended load and material handling operations. A lightweight FRP tube along with a solid grip gives the user good control, feel and precision when it comes to positioning heavy suspended steel loads.

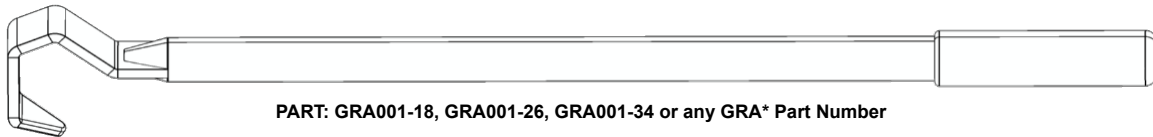

!! WARNINGS !!

Crush and Pinch Points: Avoid putting hands or fingers on or near tool head when engaged with a suspended load.

Abuse/Impacts: **DO NOT USE AS A PRY BAR** Tool head is laser cut and bent from 5052 aluminum and is very durable but can be damaged due to misuse, abuse and harsh work environments. The tool head is considered a wearable item and is NOT replaceable. Contact ADAMAR Industries for replacement tools and parts.

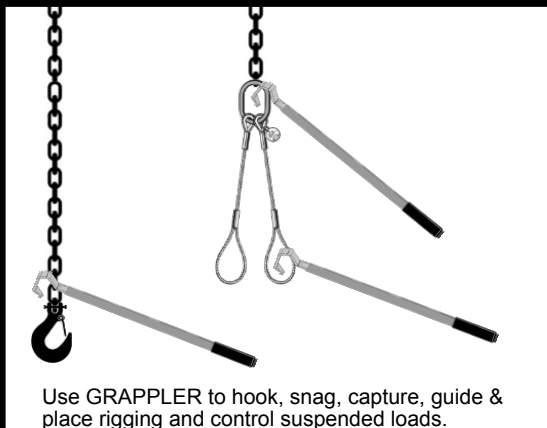

Tool Check: Check the tool for damage or extreme wear before each use, replace if damaged or extremely worn.

GRAPPLER TOOL INFORMATION & USE

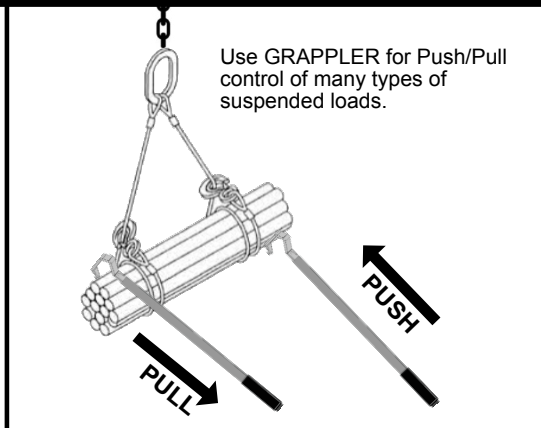

PART: GRA001-18, GRA001-26, GRA001-34 or any GRA* Part Number

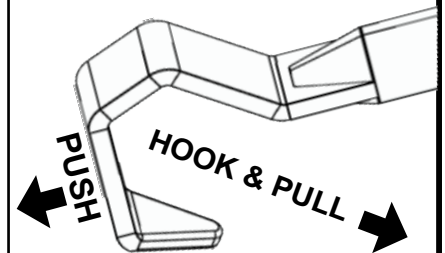

USE EXAMPLES

Use GRAPPLER to hook, snag, capture, guide & place rigging and control suspended loads.
