ADAMAR Industries, LLC. GAR line of no touch safety tools are designed to help employees reduce the risk of hand injuries when it comes to lifting, moving, flipping, rotating and maneuvering various pipe, round tube, square tube, i-beams, steel utility poles, assemblies, parts and more. GAR tools are robust, strong and durable, the GAR tool heads or attachments come in different styles and sizes, the standard GAR style "SKU's starting with GAT" which are designed for multi-purpose use, lifting, turning, carrying, torquing etc. "SKU's starting with FAT" are best suited for turning, flipping and torquing various objects and materials. The FAT attachments are F-shaped and widely used to perform tube, pipe and beam flipping, replacing the old all steel "F-Bar" style tube/pipe flipping tools. The GAR tools with an "SG" at the end of the SKU stands for Straight Grip, the "SG" tools are paired with the "FAT" style attachments and come with a knurled aluminum rotating grab handle that is bolted into the back of the attachment receiver for increased leverage, control and hand safety.

!! WARNINGS !!

Crush and Pinch Points: Avoid putting hands or fingers on or near tool head when engaged with an object.

Tool Check: Check tool head and bolt security before each use. Bolt and tool head must be tight and secure. Do not use tool if severe or substantial damage has occurred to the tool handle. Minor abrasions, gouges, scratches, dings are normal wear. If tool handle is cracked, crushed or substantially damaged, replacement of the tool is recommended.
