Below you will find the available tool board sizes and recommended placement of company branding and slogan. This document is designed to assist a graphics designer who is skilled in creating large format print graphics and has the knowledge and experience with creating print ready files from applications such as: Adobe PhotoShop, Adobe Illustrator, Affinity Designer or Affinity Photo etc. If you are not an expert in graphics design or cannot get very clean, high resolution or lossless graphics files such as: .SVG, .PDF, .EPS etc, please choose to have ADAMAR Industries design and format all the graphics for your tool boards to guarantee they look sharp and represent your company well.

Depending on the tool boards needed, please format the graphics file dimensions according to the below diagrams. Use at least 300 DPI resolution and pantone color pallet for best results. The below diagrams show a well laid out graphics design that has been proven to work and allow proper display of your company branding as well as enough room for tool storage.

PART: TB48X96 — 48" wide, 96" tall. COMPANY LOGO / NO TOUCH SAFETY TOOLS / COMPANY SAFETY SLOGAN (14" and 4"). *1" Wide Border Around Board*
